

8 June

- Meteroids model: MASTER
- Nbr of projects/user
- Orbit parameter of running satellite
- Working in group on projects
- Help page navigation, PDF version
- CPU time limitation
- Mulassis: energy biasing: advice/help
- Albedo photons (X, γ)
- Darkening of cover glass (UV, charged particle)
- Mulassis: spectrum for GCR, ESP...
- Multijonction: AZUR, EMCORE
- Solar cell: specific cover glass thickness & type
- SEU device: database?
- Path length distribution from GEMAT to UPSETO

8 June

- Mulassis analysis module: ions
- Parametric run of Mulassis
- Stopping power data
- Web services → SPENVIS model ?
- Thermal degradation of material due to radiation (low energy) ← equivalence fluence (ion. dose)
- Extending surface charging to degradation of conductivity,...

- What do you use?
 - Radiation & effects
 - Solar cell damage
 - Mulassis
 - Graphical output + Text output
 - Surface charging
